Aarseth, S., The rotation of a barred galaxy under gravitational forces 525
Alexander, J. B., Variable stars in NGC 2257 97
Allen, C. W., Oscillator strengths of neutral atoms of the iron-group 299

Astrophysics:

—— The photo-detachment of H^-, *T. L. John* 41
—— Collision broadening and shift in the λ6573 line of calcium, *W. R. Hindmarsh* ... 48
—— Electron impact excitation of positive ions: application to $Ca^+ 4s-4p$ and $3d-4p$, *H. van Regemorter* 213
—— The formation of Population I stars, II. The formation of molecular hydrogen in interstellar matter, *W. H. McCrea and D. McNally* 238
—— Oscillator strengths of neutral atoms of the iron-group, *C. W. Allen* 299
—— Radiative recombination of He, *A. Burgess and M. J. Seaton* 471
Baldwin, J. E., and C. H. Costain, The radio spectrum of the Andromeda nebula 413
Blaauw, A., Optical determinations of the galactic pole 164
Blaauw, A., C. S. Gum, J. L. Pawsey and G. Westerhout, The new I.A.U. system of galactic coordinates (1958 revision) 123
Bok, B. J. and P. F. Bok, Four standard sequences in the southern hemisphere 531
Bondi, H., Magneto-hydrostatics of stellar atmospheres II. The axially symmetric equilibrium configurations 201
Bonnor, W. B., The relativistic model of the steady-state universe 475
Burgess, A., and M. J. Seaton, Radiative recombination of He 471
Burgess, A., and M. J. Seaton, The abundance of oxygen in the planetary nebula NGC 7027 76
Buscombe, W., and P. M. Morris, The Scorpio-Centaurus association: I. Radial velocities of 120 bright stars 263
Butler, H. E., and H. Seddon, Spectroscopic measurements of early-type stars (Edinburgh paper summary) 419
Campbell, C. T., A. W. Rodgers, J. B. Whiteoak and, A catalogue of Hα-emission regions in the southern Milky Way 103

Celestial mechanics:

—— On Mr King-Hele's theory of the effect of the Earth's oblateness on the orbit of a close satellite, *P. J. Message* 1
—— On tidal torque and eccentricity of a satellite's orbit, *G. W. Groves* 497
—— Dynamical calculations relating to the origin of the solar system, *R. A. Lyttleton* ... 551
—— Rock creep: a correction, *Harold Jeffreys and Stuart Crampin* 571
Cillié, G. G., and E. M. Lindsay, The photoelectric light curve of FU Arae 333

Coordinates:

—— The new I.A.U. system of galactic coordinates (1958 revision), *A. Blaauw, C. S. Gum, J. L. Pawsey and G. Westerhout* 123
—— A 21-cm determination of the principal plane of the Galaxy, *C. S. Gum, F. J. Kerr and G. Westerhout* 132
—— Radio data relevant to the choice of a galactic coordinate system, *C. S. Gum and J. L. Pawsey* 150
—— Optical determinations of the galactic pole, *A. Blaauw* 164
—— The position of the galactic centre, *J. H. Oort and G. W. Rougoor* 171
—— Computing precise star coordinates, *A. J. Wickens and H. E. Jones* 399
Costain, C. H., J. E. Baldwin and, The radio spectrum of the Andromeda nebula 413
—— *and F. G. Smith*, The radio telescope for 7·9 metres wavelength at the Mullard Observatory 405
Cowling, T. G., Note on magnetic instabilities in stellar structure 393
Cramp, S., Harold Jeffreys and, Rock creep: A correction 571
Davies, J. G., and J. C. Gill, Radio echo measurements of the orbits of faint sporadic meteors 437
Deeming, T. J., The magnesium b lines in late-type stars 52
Eggen, O. J., A. R. Sandage and, Photometry in the Magellanic Clouds, III. The cluster NGC 1783 232
Elliott, I., M. A. Ellison and J. H. Reid, Spectra of a bright coronal prominence associated with a Class 3 flare 463
Ellison, M. A., I. Elliott, J. H. Reid and, Spectra of a bright coronal prominence associated with a Class 3 flare 463
Erratum—The flow of information in cosmological models *A. W. K. Metzner and P. Morrison* 578

Extragalactic systems:

—— An analysis of the radial velocities of galaxies in the Virgo cluster, *S. van den Bergh* 387
—— The radio spectrum of the Andromeda nebula, *J. E. Baldwin and C. H. Costain* ... 413
—— The rotation of a barred galaxy under gravitational forces, *S. Aarseth* 525
Feast, M. W., A. D. Thackeray and A. J. Wesselink, The brightest stars in the Magellanic Clouds 337

Galactic structure: PAGE
